Irrigation

Pivot Location:

Pivot Running?:

Daily Average ET Past 7 Days: .22 inches / day

Daily Projected ET Next 7 Days: .25 inches / day

<u>Location:</u>	<u>ENE</u>	<u>SSW</u>
1-12 Inches	100	95
12-24 Inches	100	95
24-36 Inches	100	95
Available inches	3.6	3.2
Days Remaining	14.4	13.0

Apply two passes of .75-.85" each in the next week.

Insects / Disease / Weather

	<u>ENE</u>	<u>SSW</u>
Rootworm Beetle	Trace	None
Western Bean Cutworm	2%	2%
Green Snap		8%
Gray Leaf Spot	None	None
Bacterial Streak	Very Light	Light-Mod

Comments

Checked a spot in the south west for green snap and it was 8% there. Real variable, it would be interesting to fly your drone over the field and get a good look at it so you know what it actually is. The main disease we are seeing in the area is bacterial streak. Hardly any fungal diseases at all. Will need to visit about your ideas for fungicide and insecticide treatments. Had 1% WBC last week.

Recommendations

Frenzy Attack @ 16 oz & Govern @ 8 oz & 13.7 oz Trivapro
 Apply on Friday or Saturday
